

Verse 1: Up in front, if a word has a part
it's called a prefix. That's where you start!
A prefix is a clue to what words mean.
So join me now on the prefix scene!

Chorus: Pre- pre- pre- pre- prefix!
Pre- pre- pre- Prefix Mix!
Pre- pre- pre- pre- prefix!
Pre- pre- pre- Prefix Mix!

Verse 2: A prefix comes before the root.
It helps you so there's no dispute.
Define the root word - now the fix!
The meaning of the prefix joins the mix!

Verse 3: Sub or under mean "below."
You wear underwear where they won't show.
Some mean "not" like un, dis, non...
If you disappear you must be gone.
(chorus)

Verse 4: Quad means "four," Bi means "two."
Tri means "three," that means a few.
Mono or uni mean just "one."
Hepta means "seven." Heptacycles are fun!
Penta means "five," and octo means "eight."
A decade is "ten" years - long to wait!
Multi and poly always mean "many."
Non can mean "none;" you haven't got any!
(chorus)

Verse 5: Pro means "for," anti means "against."
Re means to do it all "again."
Pre means "before," post means "after."
Preplanning your experiment prevents disaster!
(chorus)

Verse 6: Maxi means "big," micro means "small."
Centi means "100," omni means "all."
Trans means "across," ex means "out."
A prefix can explain what it's all about!
So know your root word - know your 'fix.
Put it altogether in the Prefix Mix.
Your understanding will improve,
joining in a fresh, new prefix groove!
(chorus)
